## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 05 May 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

### DETAILED ACTION

1. Applicant's election with traverse of group I, claims 1-9 and 18-20, in Paper No. 4 is acknowledged. The traversal is on the ground(s) that the examination of the entire applicant could be made without burden. This is not found persuasive because the present application comprises three patentability distinct inventions with proper reasons given in the Restriction Requirement as paper No. 4, and have acquired a separate status in the art as shown by their different classification.. Moreover, applicant does not traverse on the ground that the groups are not patentably distinct and submit evidence or identify such evidence now of record showing the Groups to be obvious variants or clearly admit on the record that this is the case.

The requirement is still deemed proper and is therefore made FINAL.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-9 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, line 10 and claim 6, lines 10-11, "the circumference" lack antecedent basis.

In claim 3, "the same direction" lack antecedent basis.

---

Art Unit: 3727

Claims 5 and 20 are indefinite, because a broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. In the present instance, claims 5 and 20 recites the broad recitation "a length-to widths ratio of at least one and one-half" as in the independent claim 19, and the claim also recites "a length -to-width ratio at least two" which is the narrower statement of the range/limitation.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-9 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelly (5,727,705).

In regard to claims 1 and 6, Kelly discloses, in figs. 1-3, a closure comprising a top , an annular side wall 2 having internal thread, a tamper-evident portion having leaders 4 extending across a score line to a lower band 3, the lower band including a substantially continuous internal projection 5 having an angled portion (see fig. 2).

Art Unit: 3727

In regard to claims 2, 3 and 7, the angled portion 6 extends about 90 degrees of the circumference (see fig. 2) and includes a rounded end (see fig. 3).

In regard to claim 4, 5, 8, 9, 19 and 20, the projection is substantially rectangular in cross-section and has a length-to-width ratio of more than one and one-half (see fig. 2). The angled portion 6 is angled away from the leaders 4.

In regard to claim 18, the process limitations are not considered for patentability in a product-by-process claim (see MPEP 2113).

### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ma, Samon, Prades, Pohlenz, Imbery, Jr., Zumbuhl, Luch et al., Hayes, and Pfefferkorn et al. teach closures with tamper evident portions having angled protrusions.
